LinkedIn
Paphos, Cyprus

TECH PROFILE

LANGUAGES

TypeScript / JavaScript
C#
SQL
HTML / CSS
C

FRAMEWORKS & LIBRARIES

React
Next.js
.NET
Node.js
Tailwind CSS

AI & AGENTIC DEVELOPMENT

Microsoft Agent Framework
Claude Code
Cursor
Pi

CLOUD & DEVOPS

Microsoft Azure
Docker
Git
Postman

EDUCATION

BSc Finance & Accounting
University of Macedonia, Greece
2016 – 2020

Frontend Developer Career Path
Scrimba (Certificate)
2022 – 2023

LANGUAGES

Greek — Native
English — Fluent
Russian — Basic

PROFILE

Full stack developer with a background in finance and accounting, applying analytical problem-solving to build efficient, user-centric applications with React, TypeScript and .NET on Azure. Uses agentic coding tools (Claude Code, Cursor, Pi) daily to ship faster, and builds AI agents with Microsoft Agent Framework. Passionate about turning complex challenges into clean code and committed to continuous learning.

WORK EXPERIENCE

Full Stack Developer - Roobley

DEC 2024 – PRESENT

- Designed and implemented full-stack web applications using React, TypeScript and .NET, delivering scalable, maintainable features end-to-end
- Built responsive, component-driven UIs with React, HTML and CSS, focusing on performance, accessibility, modularity and consistent design patterns
- Developed and maintained RESTful APIs in C# and .NET, integrating securely with frontend applications
- Designed and optimized SQL databases, writing efficient queries, indexes and migrations to support performance and data integrity
- Deployed and managed cloud infrastructure on Azure, including App Services, databases and environment configuration
- Integrated agentic coding tools (Claude Code, Cursor, Pi) into the daily workflow for feature scaffolding, refactoring, test generation and code review, while reviewing all AI-generated changes for correctness and security
- Collaborated in a Git-based workflow: code reviews, merge-conflict resolution and a clean version history
- Tested, documented and validated API endpoints during development and integration (Postman)
- Participated in feature planning, debugging and performance optimization across the full software lifecycle

Independent Developer - Personal Projects

JUN 2022 – NOV 2024

- Built personal projects to deepen expertise in modern web stacks (Next.js, React, .NET, SQL) and cloud-native development
- Experimented with performance optimization, reusable component design and API security across multiple applications
